

Technic Rider Requirements for the projection
Theremin: Russia With Love

Power **220 V**, different electric circuit for overhead projectors and the THEREMIN to prevent sound disturbance.

Projections stage **2 different stage elements** à 1 X 1 m. Height of the projection stage / OHP should be equal to the height of the performing stage / THEREMIN. For the performance equipment a small **table** (60 X 60 cm) will be also needed.

Light beam While performing the projections will be lead over the heads of the audience. Please make sure that there will **no stuff in the area of the light beam**.

Distance from the OHP to the stage Depends on the relation to the actual size of the screen.
Distance: minimum 5 m, maximum 12 m

Projections screen **Measure of projections screen 5 X 6 m** (width X height, absolute minimum measure 4 X 3 m). **A screen in a professional cinema quality** would be optimal. The beam of the OHP is very strong. Therefore the material of the screen should be very dense. Also possible for the projection is a **wall with a surface all over flat, painted in neutral white**.

If any of the requirements should be unfulfillable, please contact me.
